STORY ENGINE - 13/10/26

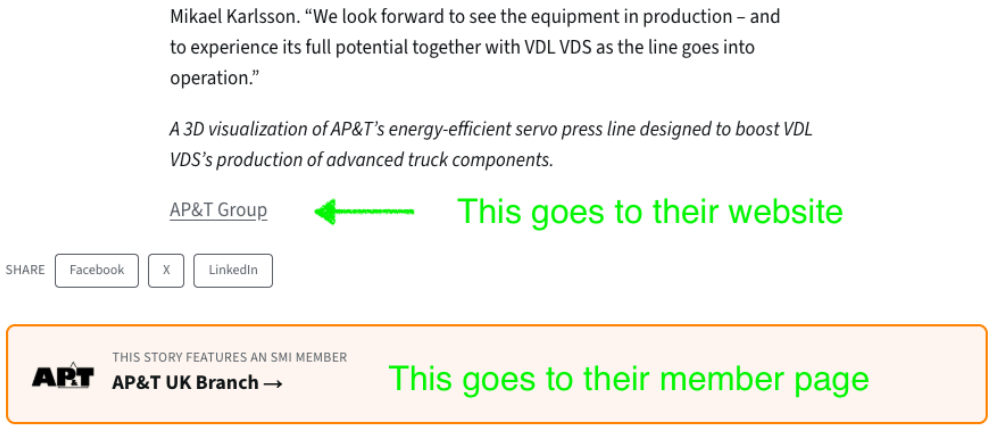

i have had no problem adding a story manually the one i have added is for BLM.It was also good to be able to use images directly from my phone.

Observations

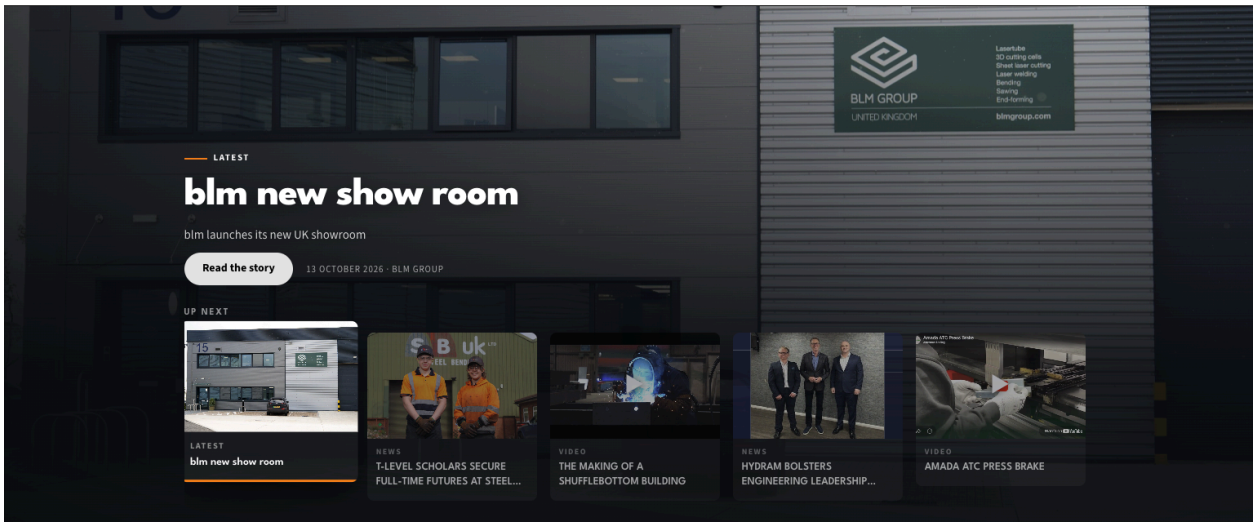

Firstly, which them option am i supposed to be using to view/test? One has a event on it and one doesnt

1. The Heading of the story can be standardised. It will always be a certain size, font,colour and will always be in capitals
2. all stories must always include a URL link back to the clients website at the bottom of the story, normally their corporate home page if they are not a member, if they are member than i prefer to link to their membership page

   a. this Url can be manually input by me when adding a story but ideally i would prefer to select from the BIGIN database, via a drop down/select. this would avoid duplication or mistakes and means I am keeping one set of data in the CRM up to date. The link is normally the company name, and again this can be standardised in font, size and colour.
3. When i uploaded images into the story there was no 'hour glass' or 'turning cog' to show me the system was updating. This was just slightly confusing as I ended up clicking around unnecessarily thinking nothing was happening.
4. When published - Can the background of the image be lightened as its too dark

5. 

6. When i looked at the story on mobile version, i thought the mobile adverts were a tad overpowering in size. Could we also introduce the ‘swiping’ option on adverts so more can be seen ?

...p-git-staging-mom-ai.vercel.app

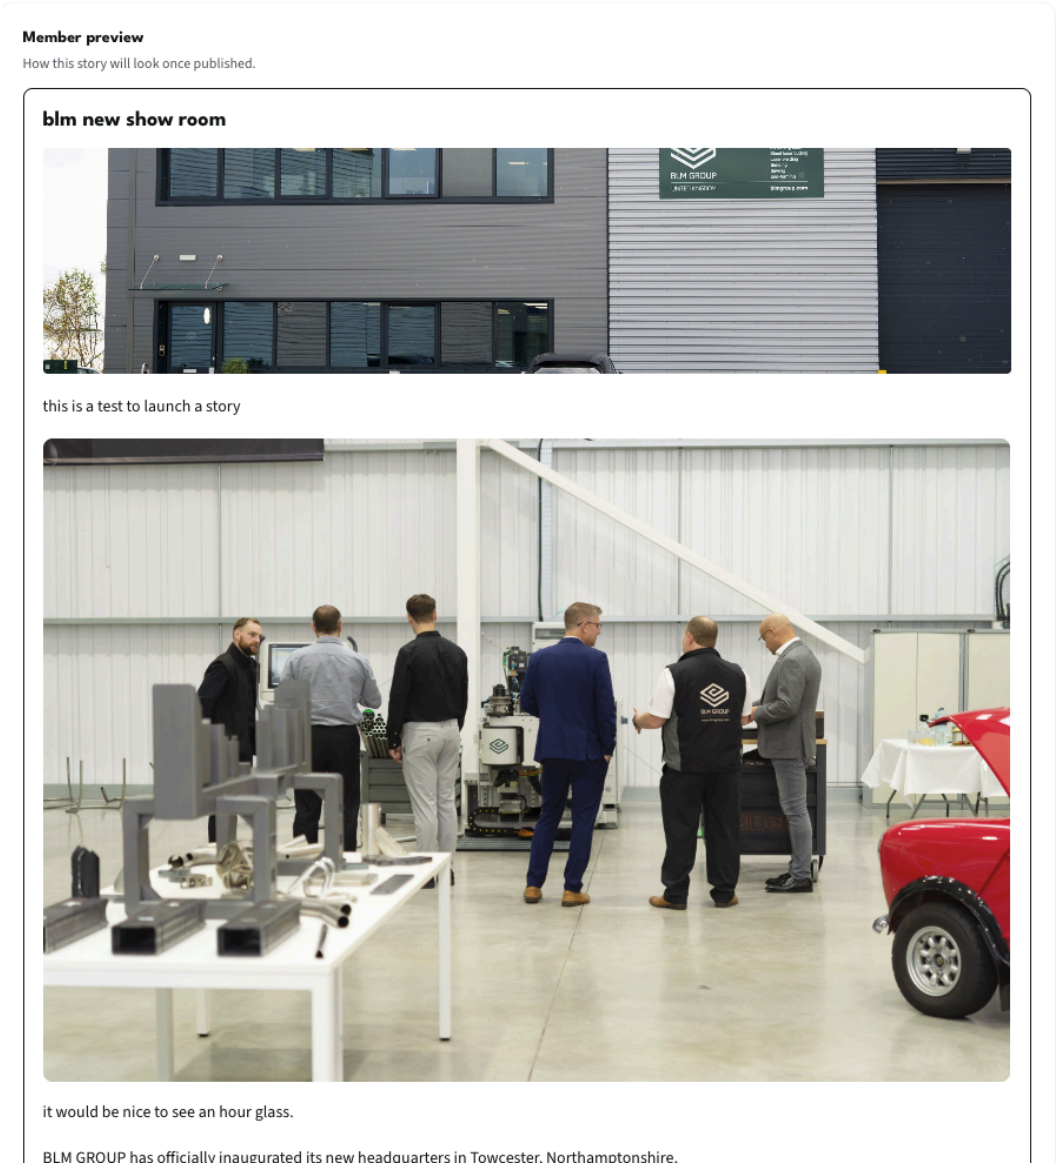

8. I am not convinced that people actually use ‘social share buttons’ directly from websites. I would suggest that the link be to the post on **our** social media pages. This grows our clicks and people are more confident to make comments directly from the post.Social icon logos should be used and maybe - VIEW/SHARE on Socials’

9.
10. Story PREVIEW - isnt quite showing how the post will actually look like when published.

11. Versus the actual

this is a test to launch a story

it would be nice to see an hour glass.

BLM GROUP has officially inaugurated its new headquarters in Towcester, Northamptonshire,

12. The member tag needs to include multiple tags. Sometimes in stories we feature multiple member, all need to be tagged to ensure the story is added to the individual member profiles and library
    a. Eg - this is an extreme example https://sheetmetalindustries.com/southern-manufacturing-2026-readies-to-welcome-visitors/

b. The area should be boxed in and more boxes tiled horizontally or vertically. Promoting the MEMBERS BRAND LOGO is very important.please make as large as sensibly possible.The wording could be more enticing - ‘CLICK FOR MORE MEMBER INFO’

13. When the story is published it looks very narrow on the desktop site.The text should spread to fill the screen to avoid unnecessary scrolling down the page

it would be nice to see an hour glass.

BLM GROUP has officially inaugurated its new headquarters in Towcester, Northamptonshire,

reaffirming its commitment to strengthening its presence in the UK and providing customers with an

even higher level of support.

Held from 6 to 8 October, the three-day event welcomed customers, partners and industry

professionals, offering them the opportunity to tour the new facility, experience the Group's

technologies first-hand and explore the opportunities offered by advanced solutions for modern

manufacturing.

Visitors were able to discover BLM GROUP's comprehensive technology portfolio, including

14.
15. Story Preview - doesnt truly depict what is published

Member preview

How this story will look once published.

blm new show room

this is a test to launch a story

it would be nice to see an hour glass.

16.
17. Versus

this is a test to launch a story

18.
19. When creating the story in the editor is there an option to actually position the image on the page and force the wording around the image. This is normally a standard way of laying out content and would be a nice way of adding variation to visual layouts.
